Introduction

From 2012 to 2016, within ErasmusAGE and Cardiovascular Epidemiology group in Erasmus MC, I worked on cardiometabolic health, cancer and bone health, looking at nutrition, lifestyle and clinical determinants of health in these areas. I was also involved in the Women's health project, focusing on the role of menopause and sex-

Copyright Assignment Form

Please fill form and return signed copy to address or e-mail address given in this form. Article can not be published without Author's signature of this Form.

Author's warranty

Name: Niko Čoku

Address: Eureka Health and Research Foundation Clinic, Tirana, Albania E-mail: niko.coku@gmail.com

Author's names: Niko Čoku

Article title: Serum gamma-glutamyltransferase and obesity: is there a link?

In consideration of publication of the Article in Medical Archives I hereby warrant and consent:

- that this Article is original work, has not been published before and is not being consider for publication elsewhere in its final form either in printed or electronic form;
- that I have obtained permission from copyright holders to reproduce material in the Article, and that I have acknowledged the resource;
- that this Article contains no violation of any existing copyright or other third party right or any material of an obscene, indecent, libelous or other unlawful nature and that to the best of my knowledge this Article does not infringe the rights of others;
- that I will indemnify and keep indemnified the Publisher against all claims and expenses arising from any breach of this warranty and the other warranties on my behalf in this Agreement;
- that in case of Article with many authors I have obtained copyright assignments from all co-authors in writing, and authorization to enter into this Agreement on their behalf, and that all have read and agreed to the above warranties.

Author: Niko Čoku Date: 03-09-2018

Copyright assignment

From January 2018 onward, all authors of Medical Archives retain copyright. They are required to grant the Journal the right to publish their article in print and electronic versions with a clear understanding that the article was not published or archived elsewhere and it is not under consideration for publication elsewhere.

Authors who publish in Medical Archives should accept the following terms and conditions:

- Authors retain copyright and grant Medical Archives the exclusive license and right of first publication with the work simultaneously licensed under a Creative Commons Attribution-NonCommercial License (<http://creativecommons.org/licenses/by-nc/4.0/>), which allows the work to be freely used, distributed, and built upon for non-commercial reasons, as long as proper attribution to the work's authorship and initial publication in Medical Archives is given.
- Authors are permitted to freely distribute the Journal's published version of the work (e.g., post it to any institutional repository, social networking platform, or publish it in any other media), with a correct reference to its initial publication in the Journal.
- All manuscripts submitted to Medical Archives are assumed to be submitted under the Gold Open Access publishing model. The manuscripts pass in-house and external peer review. When a manuscript is accepted for publication the corresponding author is contacted with an invoice for payment of 300 Euro editing and publishing fee for text up to 3000 words and up to 4 tables or graphs. For every next 500 words and every next table or graph authors need to pay 50.00 EUR NET more, please find the payment requisites below). The editing and publishing fees are required for substantive editing, facts and references verifications, copy editing, and publishing online and in print by editorial staff of the Journal. No additional fees, other than stated above, are required. The Journal accepts donations from sponsors to create a sum for payment reductions or waivers for authors unable to cover editing and publishing fee (a justification of the inability to pay should be provided). Published papers are posted on the Journal website for free downloads by readers. Any reproduction is possible with a permission of the authors who retain copyright under the following license agreement: <http://creativecommons.org/licenses/by-nc/4.0/>. Publication fees must be paid via PayPal system on Journal's website or bank transfer (Klionska društvo za izdavačku djelatnost, trgovinu i usluge d.o.o. Sarajevo, Me Hana 11, Sarajevo, IBAN : BA30 1020 5000 0002 0077, Beneficiary's Bank: Union Banka d.d Sarajevo, SWIFT: UBBKBA22).

AUTHORS STATEMENT FOR PUBLICATION

Manuscript title: Serum gamma-glutamyltransferase and obesity: is there a link?

Corresponding author's full name: Viko Çoku

Please note that all contributing authors are obligated to sign *Authors statement for publication* form otherwise the manuscript will not be published.

Please fill in the table below according to following:

- list the authors in order in which they are stated in manuscript. This way each author is assigned with number for further identification.
- each author should sign this document (on designated place in the table). By signing this form authors take full responsibility for all statements it contains.

No.	Author's full name (in capital letters)	Author's signature
1.	Viko Çoku	Viko Çoku
2.	Xike Shkembli	XSH
3.		
4.		
5.		
6.		
7.		
8.		
9.		
10.		

AUTHORSHIP STATEMENT:

According to International Committee of Medical Journal Editors (ICMJE): "An author is considered to be someone who has made substantive intellectual contributions to a published study. An author must take responsibility for at least one component of the work, should be able to identify who is responsible for each other component, and should ideally be confident in their co-authors' ability and integrity." (available at: http://www.icmje.org/ethical_1author.html)

Please fill the table with numerical code of each author (from the before signed table) regarding authors contribution to specific component of research.

Component of the research	Author's number
substantial contribution to conception and design	VČ, CSH
substantial contribution to acquisition of data	VČ, CSH
substantial contribution to analysis and interpretation of data	VČ, CSH
drafting the article	VČ, CSH
critically revising the article for important intellectual content	VČ, CSH
final approval of the version to be published	VČ, CSH

Please tick the box if the statement applies:

- ☐ to the best of your knowledge everybody who participated substantially in the study is not omitted from the article
- ☒ to the best of your knowledge, all persons listed as authors qualify for authorship

All persons who have made substantial contributions to the work but do not meet the criteria for authorship are listed in Acknowledgments section (technical help, writing assistance, general support, financial and material support)

- ☒ Yes ☐ No

All persons named in the Acknowledgment section of the manuscript have given their permission to be named

- ☒ Yes ☐ No

ORIGINALITY OF THE WORK STATEMENT:

Editorial board of the journal: Medical Archives; Matera Socio-medica or Acta Informatica Medica strongly promotes research integrity and aims to prevent any type of scientific misconduct according to Committee on Publication Ethics (COPE) flowcharts. (available at: <http://publicationethics.org/resources/flowcharts>)

Please tick the box if the following statements are correct to the best of your knowledge:

- ☒ the manuscript is not previously published in the same or very similar form in other journal (previous publishing does not apply to abstract or poster presentations at a professional meeting)
- ☒ the manuscript is not currently under consideration in other journals (that does not apply for manuscripts that have been rejected by other journals)

RESEARCH ETHICS:

According to International Committee of Medical Journal Editors (ICMJE): "When reporting experiments on human subjects, authors should indicate whether the procedures followed were in accordance with the ethical standards of the responsible committee on human experimentation (institutional and national) and with the Helsinki Declaration of 1975, as revised in 2008" (available at: http://www.icmje.org/ethical_6protection.html).

The Editorial board may require proof of ethics committee approval. Do **not** send original documents to the Journal but be sure to archive it for further purposes.

Reported research was approved by institutional/national ethics committee:

- ☒ Yes
- ☐ No
- ☐ Not applicable

If yes, please state the name and location of the approving ethics committee:

If no, please provide further details:

PATIENT PRIVACY AND CONFIDENTIALITY:

According to International Committee of Medical Journal Editors (ICMJE): "Patients have a right to privacy that should not be violated without informed consent. Identifying information, including names, initials, or hospital numbers, should not be published in written descriptions, photographs, or pedigrees unless the information is essential for scientific purposes and the patient (or parent or guardian) gives written informed consent for publication." (available at: http://www.icmje.org/ethical_5privacy.htm)

The Editorial board may require proof of participant consent. Do **not** send original documents to the Journal but be sure to archive it for further purposes.

The appropriate informed consent was obtained from all research participants:

- ☒ Yes
☐ No
☐ Not applicable

If no, please explain:

COPYRIGHT TRANSFER:

All manuscripts published on line are subjected to Creative Commons license in order to prohibit improper use of published material. Journal Medical Archives prescribes license that obligates users to provide attribution to the original manuscript, prohibits commercial use of the work and permits reuse provided the work is not modified. Complete legal background of license is available at: <http://creativecommons.org/licenses/by-nc-nd/3.0/deedcode>

By signing this form authors agree with the following statements:

- If this manuscript is accepted for publication in journals: Medical Archives; all copyrights of the paper will be transferred to the journals.
- Publisher: Academy of Medical Sciences of Bosnia and Herzegovina, Mis Irbina 11, 71000 SARAJEVO, Bosnia and Herzegovina (Tel./fax.: +387 33 226 866; www.amn.ba) has the right to reproduce and distribute article in printed and electronic form without asking for permission.

Report 1.

Dear Editor,

article is interesting and gave some interesting option for obesity screening. Authors have to prepare article according to template. They have to revise references according to journal instructions. Also, tables are not prepared in proper manner.

Report 2.

There is some lack of evidence in discussion, but article can consider for publication.

Article should be written according to template. References are not written well.

Dear Editor,

again very sorry for the inconvenience. I hope we have now corrected the references both after the text and after the tables where you had started making the changes. Also I added the ORCID in the first page. Please let me know in case further changes would be needed.

Would it now be suitable for publication?

Thank you very much,

Viko

Abstract

[Go to:](#) [☑](#)

Background

Little data is available on gamma-glutamyltransferase (GGT) and body fat distribution in healthy individuals. We examined whether GGT within normal range is prospectively associated with total body fat (TF) and regional body fat distribution.
